PROJECTS / OPEN-SOURCE

MULTIBANKING SYSTEM | LINK   JAVA, JAVASCRIPT, CSS

1.The Multi Banking System Interface is targeted to the future banking solution for the users .

2.Who is having multiple bank accounts in multiple banks. This interface integrates all existing banks and provides business solutions for both retail and corporate.

3.This system acts as a standard interface between the clients and all the banks, By using this portal any client who maintain accounts in various banks can directly log on to MultiBanking System interface and make any kind of transactions.

4.In the backend, system will take care of the entire obligation required in order to carry on transaction smoothly.

MULTITHREADED CHAT SERVER | LINK   JAVA

1.A chat application which is written in JAVA where users can have group chats or private conversations. simultaneously by using the concept Multithreading.

2.This application involves two core components, they are Server and Client. The server is multithreaded, as it needs to handle multiple clients .

3.Initially the Server should be up and running when the user launches the chat application (Client). Then the client is prompt to enter a username and then check whether it exists, if not he/she is connected to the server.

4.The chat window previews the contact list that has joined the chat room (Group Conversation)
